Intro Music - "My (Your) Father Is So Good To Me"

Hi, my name is Carl Vasta and I would like to welcome you to the Bible Seeds section here, at Understanding God's Word. This is where I get to comment on biblical readings and stories that brings the bible into what's happening to us in our daily lives.

I'll touch on such topics as Family Prayer or Why I Believe There Is A God. I'll talk about what was predicted that makes these the Terrible Times In The Last Days, or how to Have A Daily Meaningful Relationship With God.

I would like you to know how much GOD loves you. He is ready and waiting to help you. You just need to believe that He exists and has created all things and has given His Son Jesus, (the good shepherd), to bring you back to Him.

Today's topic is **"Why I Believe There Is A God."**

Have you ever wondered if there is a God? One who is responsible for the creation of the Universe and all living things? Take a look around you and notice the things you see. A desk, a television, furniture, a computer, pencils, pens, the room that you're in. If you're outdoors, notice the roads, the sidewalks, cars, trucks and buses, the street lights and traffic signals, buildings, and much more.

They all have one thing in common. ***A designer.***

Doctors and scientist have shown us that our bodies contain enough systems that enable us to see the world, to hear the sounds and feel the textures of our life. And to taste the many flavors of food we eat. The digestive system breaks down the foods that we eat and nourishes our bodies. Our hearts pump blood through veins and arteries to deliver oxygen that is received from the lungs. Our immune system fights diseases and heals our scrapes and cuts. Our muscles and bones help us to move and run.

Our brain, the super computer of the body, sorts it all out and makes the systems all work together. It is the brain that helps us to remember and helps us to forget. Gives us emotions to laugh and cry. Yes, it even helps us to fall in love. Because of the brain, we have the ability to solve the many problems that life presents us.

Some people say there is no God. That life came from a mixture of elements thrown together at the mysterious dawn of creation, and because the conditions were right, life was spawned. ***So what we are today evolved from that! A body with no designer?***

Isn't amazing. We live in a world where everything around us is designed manufactured by somebody, but our bodies have no designer?

Yet, how can we justify the thousands of years of research and the uncountable amount of money mankind has spent trying to unlock the mysteries of a body that no one designed?

*Take a deep look into the night's sky, and ponder – **where we are.***

The complicated Universe, spinning in a orderly fashion. **No designer you say?** That's why I believe **'There is a God'**. A great design by **The Great Designer.**

I believe that the whole Universe and all creation exist in 'the mind of God' and that is why whatever He wills is done.
